

# Hackathon-Project-HTML-CSS

## (TEAM-A)

### Team Members

- Kanishkk Kingwani
- Krishna Soni
- Prithish Parekh(Team Leader)
- Alabhya Jain
- Sarika Kumari
- Shivansh Tomar

### Advanced Requirements added to Project

- Dark Mode Toggle using CSS variables.
- Staggered animations or smooth transitions using keyframes.
- Fluid typography using clamp().
- All layouts must be responsive across mobile, tablet, and desktop.

### Suggested Features or Sections to add in the current Communiqué (entire) website

- **Upcoming Event Section:** Registration links for events can be provided over there (increases site visitors).
- **Achievement & Impact Section:** Key Collaborations or Recognitions, Testimonials from participants or alumni, Students impacted can be shown.
- **Get in Touch Section:** One can write their query regarding the society or any event.

### Problems or Limitations in the website

- Navigation Bar is crowded, sections in the homepage can be put in a single section “Home” with a drop down button.
- Alternate text for images is not available.
- Nav Toggle/Hamburger Icon is not visible on opening the site(visible only after clicking on the Nav Bar once), letting visitor think there is no section.
- Images in the Governors Section are not in proportion on mobile view.
- Animation is not smooth.
- Governors Section looks artificial.

# Improvement after Redesigning Home Page

- Get in Touch Section provided for visitors to ask any query.
- Dark Mode Toggle provided.
- Smooth animations applied to enhance flow.
- The Hamburger button was made visible in mobile view.
- The images of governors are in perfect proportion.
- The Footer is enhanced by a huge margin.
